Technical Data Sheet

Polycarbonate based micro granulates filled with 30% glass fibers for Fused Granulate Fabrication.

Pellet Properties	
Pellet Diameter	Approx. 2mm
Pellet Length	Approx. 2mm
Pellet Size	1 ± 0.25g
Pellet Shape	Cylindrical, cold cut
Available colors	Dark grey

Packaging	
Available in 20 kg boxes with 2*10 kg bags	

Recommended Extrusion Parameters	
Zone 1 Temperature	210 ± 20 °C
Zone 2 Temperature	245 ± 20 °C
Zone 3 Temperature	285 ± 20 °C
Nozzle Temperature	300 ± 20 °C
Bed Temperature	90 ± 10 °C

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose. Any descriptions, drawings, photographs, data, proportions, weights etc. given herein may change without prior information and do not constitute the agreed contractual quality of the product. It is the responsibility of the recipient of our products to ensure that any proprietary rights and existing laws and legislation are observed. Values in this document are average values, measured and calculated according to the instructions in the listed standards. The used specimens are produced with the Fused Filament Fabrication method. Measured values can vary depending on used print orientation and print parameters.

Please contact us for further product information, like for example REACH, RoHS, FCS.

The safety data given in this publication is for informational purposes only and does not constitute a legally binding MSDS. The relevant MSDS can be obtained upon request from your supplier or you may contact Forward AM Technologies GmbH directly at sales@forward-am.com.

Process materials in a well-ventilated room, or use professional extraction systems.

Drying Recommendations

Temperature	100 °C
Time	8-10 h
Condition	<300 ppm
Please note: To ensure constant material properties the material should always be kept dry.	

General Properties	Standard	Average Values
Bulk density	ISO 1183-1	1076 kg/m ³

Test specimen / Material A2021-2560 Ultrafuse PC GF30 black	Test methods (Standard and publication date) - IEC 60695-11-10:2014 vertical (equivalent to UL94:2020)
Order received on: 2021-04-09 Specimen received on: 2021-04-12 Tests conducted on: 2021-04-20	This report contains: Pages: 3 Diagrams: 0 Tables: 2 Photos: 0 Attachments: 2

Decision rule

EN45545-2:2016, R26 (EL 10): HL1-3 (V0)

Result

Test specimen of nominal thickness 1.5 and 3 mm were subjected to vertical flammability testing according to DIN EN 60695-11-10:2014 (equivalent to UL94:2018). The test result is V-0. This result provides evidence for conformity with EN45545-2:2016, R26 for HL1, HL2 and HL3.

The test results of this report are only valid for the specimens tested and only describe the results achieved by the application of the particular tests methods to these specimens. They do not imply any guarantee nor any agreement on a contractual quality or a suitability of the product for a specific purpose. In view of the many factors that may affect processing and application of the product, the test results do not relieve processor from carrying out own investigations and tests. The report does not imply any recommendation for a product. The report shall only be reproduced and passed on in full.
 The testing laboratory is accredited by DAkkS Deutsche Akkreditierungsstelle GmbH (German Accreditation Body) according to ISO 17025 for mechanical, thermal, physical-chemical and flammability tests. The accreditation is valid only for the scope of accreditation listed in the Annex to the accreditation certificate (Registration No. D-PL-14121-04-00).

BASF – Fire Safety Technology

**Classification report according to DIN EN 45545 Part 2 : 2016-02
Railway applications - Fire protection of railway vehicles - Part 2: Requirements for fire behaviour of materials and components**

Classification Report No.: 14781 / 54278 Rev. 1

Receipt of order: 03.02.2022

1. Material: (information supplied by client)

Ultrafuse PC GF30
Order number: ATLaS-2021-3296 + 3335

Colour:

End use application: interior covering train

2. Summary of results and classification:

Standard: DIN EN 45545-2:2016-02		Set of requirements: R22 / R23 / R24			
14781 / 54267	EN ISO 4589-2	LOI	≥ 32,0	[% O2]	HL3
14781 / 54265 Thickness: 1,5 mm	EN ISO 5659-2 25 kW/m² (pilot flame)	Ds (max)	19		HL3
14781 / 54290 Thickness: 3 mm	EN ISO 5659-2 25 kW/m² (pilot flame)	Ds (max)	89		HL3
14781 / 54266	NF X 70-100-1/-2 600 °C	CIT (NLP)	0,20		HL3
Final classification:		HL3			

Remarks:

Valid for thickness range from 1,5 mm to 3 mm
Corrected version of report 14781/54278 dated of 02.03.2022.

Any conclusions we draw about the fire safety of the materials we test are based exclusively on the results of the test under the conditions described. The extent to which such conclusions can be applied to non-tested material under non-standard conditions is the sole responsibility of the customer and is done so at his own risk. - Decision rule acc. to DIN EN ISO/IEC 17025: Wherever statements of conformity are made, no measurement uncertainty is taken into account.
