

Enterprise - Workflow: Full Engineering

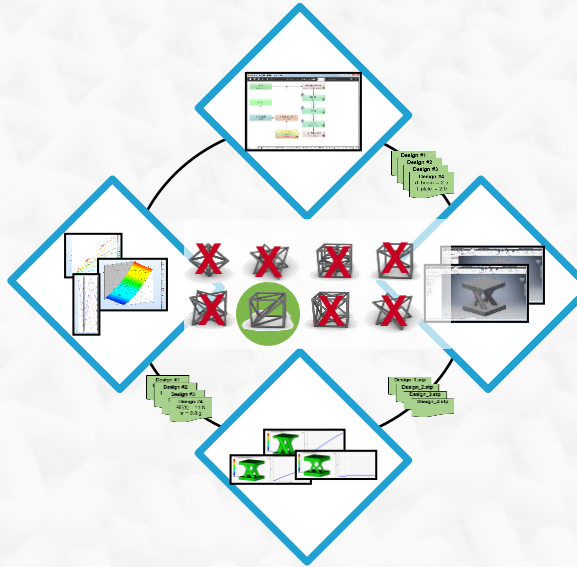

1. Kick-Off Meeting

1 hour of your time to understand your problem and derive a solution concept. This may include a lattice development, a full product development or out-of-the-box service.

2. We develop the customized solution together

Depending on the customized solution concept, we work together to develop your lattice design.

3. You receive the digital lattice design

An .stl with the lattice design of your part is sent to you.
